

Director Powell,

This writing concerns new proposal expanding LPFM to gain priority over FM translator services.

I currently listen to two (2) different FM translator stations and enjoy the fact that I can pick up the same broadcast at the same time in varying locations as I travel. Stations like these, such as K-LOVE are performing a beneficial public service and is listened to by thousands of residents in this local area. These stations provide a broad service to every community they reach, additionally those that are privately funded can only exist if the local community believes they are a needed resource and the citizens choose to fund them.
